

## **ABSTRACT**

The present invention 10 discloses an inexpensive, reusable, and compact picture leveling template where the design of the device 10 would allow the user 12 to arrange picture frames 14, shadow boxes 70, shelving 77, signage, or any objects with 2 or 3 dimensions that could be mounted on a wall 16 in a preferred arrangement in limitless aesthetic combinations on a vertical surface of any size or slope along with curved wall surfaces. The template 10 has multiple leveling guides 24, 28, 32 to assist the user 12 in leveling and spacing picture frames 14 horizontally and vertically on any vertical surface 16. The present invention 10 may be a three-part, inexpensive compact kit comprised of a planar pliable material 18 with multiple leveling lines 34, 36 inscribed thereon, a non-shear adhesive 38, and bubble levels 40 for use with a non-shear adhesive.
